

Course Project Overview

The course project is a key component of this course, accounting for **50%** of your final grade. It is a collaborative effort designed for teams of **2 to 4 students** to build and deploy a **creative mobile application** using **React Native** and **Expo**. The project allows you to apply and expand upon concepts from lectures, demonstrating your ability to design, implement, and manage a mobile app with innovative features and a polished user experience.

Key Milestones

Milestone	Due Date	Submission Method	Weight
Team Formation	Sunday, October 5, 2025	Submit team member list via Quercus ↗	
Project Proposal	Sunday, October 19, 2025	Upload Markdown file to Quercus ↗	15%
Presentation Slides	Monday, November 17, 2025	Submit slides via Quercus ↗	
Presentation	Lecture 11 (November 19, 2025) & Lecture 12 (November 26, 2025)		10% (5% peer, 5% instructor/TAs)
Final Project Deliverable	Sunday, December 7, 2025	Submit GitHub repo URL via Quercus ↗	25%

 Note

All deadlines are at **11:59 PM EST** on the due date.

Presentation slots have been randomly assigned and are available via the following links:

- [November 19 Slots](#)
- [November 26 Slots](#)

Project Structure

The project involves forming a team, proposing a creative mobile application, presenting your work, and delivering a fully functional system. Key requirements include:

- **Core Technologies:** React Native with Expo, React Navigation, state management, React Native Async Storage for persistence, Expo device APIs, Expo Notifications, REST API integration, and deployment via Expo EAS Build.

- **Advanced Features:** Implement at least two (e.g., user authentication, real-time updates, offline support).
- **Deliverables:**
 - **Proposal:** A Markdown document outlining motivation, objectives, features, and plan.
 - **Presentation:** A 5-minute in-class demo of your project's features and technical implementation.
 - **Final Deliverable:** A GitHub repository with source code, a `README.md` report, and a 1-5 minute video demo.

 Warning

All deadlines are strict, and late submissions will **not** be accepted.

For private GitHub repositories, add the instructor and TAs as collaborators **before** the final deadline.

Additional Information

- See [Course Project Guidelines](#) for detailed requirements and marking rubrics.
- See [Presentation Rubric](#) for presentation grading details.
